

The Westminster College Campus Activities Board brought High Flying Adventures to campus on Friday, April 3, 2009. The tethered hot air balloon was a huge hit! We were lucky to have perfect weather and the hot air balloon was advertisement in itself. One of our biggest attended events for the year, High Flying Adventures proved to be an event great for students, faculty, and staff.

Not only was it a hit for our campus community, but the staff of High Flying Adventures were also very pleasurable to work with. They contacted us about a week before the event and worked with us to create multiple plans depending on the weather. They were extremely knowledgeable and quickly eliminated any worries I had.

Upon arrival the two hot air balloon professionals were accommodating and great to work with. Set-up took very little time and they were very understanding of our changing winds in Mid Missouri. They took up over one hundred people and were willing to stay a little longer to make sure everyone got a chance to go up in the hot air balloon. Take down was also very quick and easy and they were very thankful to have a few volunteers to help with this.

The Westminster College Campus Activities Board would definitely recommend any school to use High Flying Adventures on their campus and we hope to bring them back again in the near future.
