

Hypnotist The Incredible BORIS – Suggested Stage Plot and Setup

General Requirements

Stage

- Chairs **without arm rests** should be arranged in a straight line. If space permits, leave room behind the chairs to be able to move around. Otherwise please set them against the back wall.
- Side table should have water and glasses. Bottled water is preferred.
- Suggested minimum stage size is 10' x 16' – the bigger the better (this way it can accommodate more volunteers).

Lighting

- Soft front wash. No Effects.
- No follow spot required, unless the venue warrants it.

Sound

- Playback sound monitors (speakers for the performer on stage) should be used wherever possible to assure crisp and clear sound for the participants.
- One microphone (cordless or corded) and a backup. If the microphone is corded, the wire should be long enough to reach the whole stage area.
- One microphone stand.
- System input required. Please provide one of the following - DI box (direct input box) or XLR or 1/4" input. BORIS controls musical queues remotely through a laptop, which is plugged directly into the sound system. The laptop will be set on the side table.
