

## TECH RIDER FOR AURA WEAVER

**TECHNICAL REQUIREMENTS:** We will discuss with you, in advance, the specifics of the equipment & space that you have available. If any of these requirements cannot be met, we can generally find a workaround; however, advance notice is imperative to the success of the event. The following requirements are intended to ensure the highest-quality photographs and the safety and comfort of the Aura Weaver team.

### FACILITY:

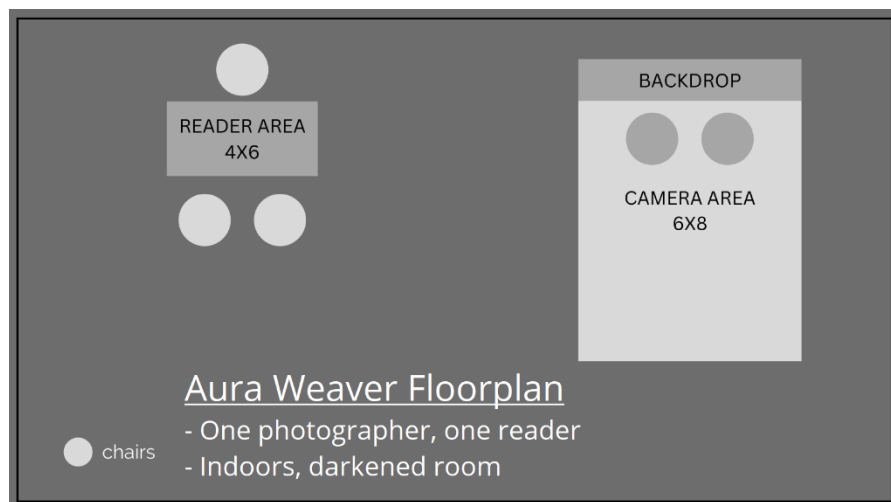

- **Indoor events:** The camera used by the Aura Weaver team performs best indoors in a dark room without skylights where the operators can fully control the lighting. If such a location cannot be provided, please notify AGENT so the Aura Weaver team knows in advance to supply a blackout tent.
- **Outdoor events:**
  - **Nighttime:** If the event is to be held outside, the next best option after a darkened room is a nighttime event under a covering. The Aura Weaver team will bring their blackout tent to provide extra protection in case of sudden weather. The covering must accommodate the 5'w x 5'l x 8'h blackout tent provided by Aura Weaver.
  - **Daytime:** Daytime outdoor events are the most challenging events. If the event is to be held outside during the daytime, PURCHASER must provide a tent in a well-shaded area to ensure photos turn develop at a high quality and to ensure the safety and comfort of the Aura Weaver team, especially in high-heat conditions. The inside of the tent must accommodate the 5'w x 5'l x 8'h blackout tent provided by Aura Weaver. Additional blackout material may be provided and set up by the Aura Weaver team if deemed necessary.
  - **Non-viable locations:** Coastlines and events held in fields are generally nonviable. If an event is to be held at or near a beach, it must be held indoors as the camera used by the Aura Weaver team is affected by humidity, heat, sand, and excessive sunlight. Similarly, outdoor field events in hot conditions with high humidity and little to no shade are not suitable.

**EQUIPMENT:** For events with both an Aura Reader and an Aura Photographer, 2 small tables, 4 chairs, 2 bottles of water, and access to electricity are required. For events with just an Aura Photographer, one small table, 2 chairs, one bottle of water, and access to electricity are required.

### CREW AND WORK SCHEDULE:

- One volunteer from PURCHASER to manage the line and timing expectations is strongly encouraged.
- A minimum of one-hour setup time prior to the start of the event is required for the Aura Weaver team to prepare the camera and lightproof the staging area.
